## DATES FOR THE LIFE SCIENCES CALENDAR

The coming year is packed with exciting local and international events. Here's a taste.

### **OzBio 2010**

September 26-October 1, Melbourne

This premier international scientific meeting brings together the 12th IUBMB Conference, the 21st FAOBMB Conference and the ComBio2010 meeting. This unique blend of participating societies will generate an outstanding scientific and technological event, which will be of major interest to biochemists, molecular biologists, cell and developmental biologists, and plant scientists. The world's top speakers in these areas will present their exciting new findings in major plenary sessions and in a wide array of more specialist symposia.

### **BioProcessing Network Conference** October 12-14, Melbourne

The BioProcessing Network is an association of scientists, engineers, students and others interested in fostering and advancing the knowledge and understanding of the technical aspects of the biotechnology industry. This meeting will gather together researchers, manufacturers, suppliers and others with an active interest in bioprocessing. Informative presentations will be followed with lively discussion on the presented new data, new developments and emerging trends and concepts – all in a relaxed environment where participants can catch up with old friends and establish new contacts.

### **AusBiotech 2010** October 19-22, Melbourne

AusBiotech 2010, with its key theme 'Creating Global Solutions', will focus on the solutions that biotechnology is developing to deliver a brighter future. Whether it is in new therapies, diagnostics, medical devices, agricultural, industrial or climate change, biotechnology is at the heart of finding better options and answers to issues that we share around the globe. From the research laboratory, through the process of development and commercialisation, to the consumer, it's all about creating solutions.
