AusBiotech2010

Event Dates: Tuesday 19 - Friday 22 October 2010
Melbourne Convention & Exhibition Centre, Victoria, Australia

AusBiotech 2010, with its key theme 'Creating Global Solutions', will focus on the solutions that biotechnology is developing to deliver a brighter future. Whether it is in new therapies, diagnostics, medical devices, agricultural, industrial or climate change, biotechnology is at the heart of finding better options and answers to issues that we share around the globe. From the research laboratory, through the process of development and commercialisation, to the consumer, it's all about creating solutions.

We would like to extend to you an exclusive invitation to join us at the 2010 AusBiotech national conference, the premier biotechnology conference for Australia and the Asia-Pacific region. The event will be held in Melbourne, Australia on 19 – 22 October 2010. It is proudly hosted by AusBiotech Limited, the biotechnology industry organisation representing more than 3,000 members, in the interests of developing the biotechnology sector in Australia.

This event will bring together representatives and professionals from across the biotechnology industry and the globe to produce a world-class event. A comprehensive and integrated conference program will encompass an extensive BioIndustry Exhibition and the increasingly popular Business Matching Program to demonstrate how AusBiotech has earned its reputation as a host for this flagship industry event.

The AusBiotech national conference attracts senior people from across the sector as well as investors and business development professionals. The attendance of prominent biotech individuals, offers key networking and partnering opportunities, and provides insights and inspiration on the major trends affecting the industry.
