A 2010 National Australia Bank Australia-Israel Chamber of Commerce Yachad scholarship has been awarded to AusBiotech chief executive officer Dr Anna Lavelle, who will tour Israel to study the state's biotechnology industry.

The industry body chief will study alternative methods for accessing capital and incentivising the growth of innovative companies, and its innovation policies and programs.

Lavelle said the study tour would foster relationships and provide an opportunity to learn from the Israeli innovation success story.
