ABOUT THE COMPANY

Atomo Diagnostics develops and commercialise innovative solutions that substantially improve in-field and at home based testing. Our multi-award winning AtomoRapid™ platform was designed with ease of use, performance and convenience as primary considerations.

Our Values

- Impact – we seek to transform health outcomes worldwide
- Integrity – we're honest, ethical and fair in all our dealings
- Innovation – we develop next generation technology to create breakthrough improvements in usability and diagnostics performance
- International – we partner globally to innovate and deliver products

Transforming Health

- In developing the AtomoRapid™ platform, our goal has been to transform health outcomes worldwide – and ensure access in developing communities. Through launching our HIV and malaria tests in Africa, we seek to play a significant role in reducing the devastation these diseases cause in the community.
- We work closely with providers of services to impoverished communities, by providing tests through tiered pricing as a way of increasing testing rates. This has the effect of facilitating earlier diagnosis and enabling treatment to begin sooner – producing improved quality of life and health outcomes.

KEY OR LEAD TECHNOLOGY

The AtomoRapid™ platform.

This platform is proving to be truly disruptive in the rapid diagnostic test (RDT) market as we work towards providing accurate, reliable and easy to use technology for the diagnosis of a range of diseases. This revolutionary technology continues to receive global industry recognition, please refer to our website for more information.

ATOMORAPID™ IS:

- Easy-to-use making the testing process efficient and simple.
- All in one, which eliminates many of the in-field errors common with current test kits.
- Safe, with a contact activated lancet that locks out after use.
- Accurate & reliable with test results available in minutes.
- Designed with self-testing in mind.
- Cost effective by being competitively priced, saving on staff costs and eliminating laboratory costs.
