## **ABOUT THE COMPANY**

Celebrating 10 years of operations in 2011, Core Medical Solutions was founded in 2001 to deliver industry leading electronic solutions for the information management needs of all healthcare professionals.

Over this decade, the Company has grown to become a leading provider of clinical information systems with interests across the Asia Pacific region, led by the BOSSnet Clinical Information System and a suite of associated products and applications.

Armed with our unique understanding of the exact needs of clinicians, our proprietary solutions enhance healthcare delivery and responsiveness, whilst increasing cost efficiencies.

They remain user friendly yet powerful and not overburdened with unnecessary complexity.

Providing clinicians with the right information, in its most effective form and in the most efficient way possible is at the heart of what we do.

Our product range includes:

- **BOSSnet** – Clinical Information System – Scanned Medical Record, Patient Information Management, Electronic Order Entry & Results, Electronic Medical Record, Electronic Medication Management, Electronic Discharge Summary, Desktop and Mobile delivery
- **Panavista** – Digital imaging – Electronic delivery & viewing of patient radiological results and images working within clients chosen patient management system. Desktop and mobile delivery of images.
- **PulseNET** – Electronic data exchange and patient management interface.

## **KEY OR LEAD TECHNOLOGY**

BOSSnet is the Clinical Information System to make medicine simpler for the clinician, more cost-effective for the hospital and ultimately better for the patient. Developed, trialled and proven within Australian hospitals, BOSSnet stands today as one of the country's most commended clinical systems.

With an intuitive and clinically relevant design BOSSnet enables day-to-day clinical activities to be performed with greater speed and higher quality, and ensures that duplication in the medical environment is eliminated. BOSSnet is modular by design, allowing hospitals to customise their own deployment strategy. Being web-based, BOSSnet can be accessed via handheld or mobile device at the patients' bedside or any other location within the hospital with access to a wireless network.

BOSSnet can even enable speedy access for offsite clinicians connecting over secure internet.

BOSSnet provides:

- Clinician dashboard for access to all patient information
- Patient lists/ Task lists/ Work lists
- Electronic order entry
- Electronic results review, endorsement and reminder service
- Scanned Medical Record
- Electronic medical record
- Electronic Medication Management
- Electronic Discharge Summary generation and secure dispatch
