公司简介

Norseld 是一家位于澳大利亚的美容医疗激光生产厂商。本公司生产、营销并面向全球市场供应美容医疗用激光。基于 25 年的研究开发, Norseld 完善了溴化铜激光作为治疗血管和色素病灶的黄金标准。我们精心挑选全球分销网络, 并采用合作管理的方式, 确保全球终端客户获得最新的治疗方案、技术支持和使用建议。我们不断地为本公司独特的 FEM® 激光技术开拓创新性的应用。Norseld 的双黄色激光产生每秒 2 万 2 千次的微脉冲, 在真皮层产生光化学反应, 可用来活化肌肤, 治疗黄褐斑和痤疮。Norseld 是溴化铜激光的创始者和创新者。

关键技术或领先技术

双黄色激光系统具有强大、高速、先进的特点, 且配有固态电子技术, 是被全世界临床医生公认的理想治疗选择。该溴化铜激光系统的问世得益于 Norseld 对这类技术扶持和投资。该双黄色激光系统生成两种独特的波长—578 纳米黄光和 511 纳米的绿光。

FEM® 技术是我们研发部最新的研究成果。该部门致力于投资开发独特的溴化铜技术。采用 FEM® 技术的双黄色激光将为治疗血管病变、不流血去除大面积病灶, 以及激活胶原蛋白活化肌肤等方面带来快速、高效、立杆见影的效果。该技术目前已成为治疗黄褐斑的黄金标准。应用 FEM® 技术的双黄色激光实现了最佳波长、穿透深度和功率密度完美结合, 在全世界绝无仅有。

Key contact name: Peter Shute

Job title of key contact: Managing Director

Company website address: www.norseld.com

Company address: 18 Lowe Street, Adelaide SA 5000

The company is Unlisted.

ABOUT THE COMPANY

Norseld is an Australia-based manufacturer that makes, markets and sells medical lasers for use in aesthetic markets around the world. Founded on 25 years of research and development, Norseld has perfected the Copper Bromide laser to be a gold standard in the treatment of vascular and pigmented lesions. Our global distributor network is carefully selected and a collaborative approach is taken ensuring that our end users around the world are getting the latest treatment protocols, support and advice. We continue to break new ground in the application of lasers using our unique FEM® technology. The Norseld Dual Yellow laser produces 22,000 micropulses per second and creates a photochemical reaction in the dermis treating Melasma, Skin rejuvenation and Acne. Norseld is the originator and innovator of Copper Bromide lasers.

KEY OR LEAD TECHNOLOGY

The powerful, fast and advanced Dual Yellow laser system, with solid state electronics, is a proven choice for clinicians around the world. This copper bromide laser system is the result of Norseld's commitment and investment in this type of technology. The Dual Yellow uniquely produces two wavelengths – 578 nm yellow and 511 nm green.

FEM® Technology is the latest from the talented Research and Development Department, which is committed to investing in the unique technology of copper bromide. Dual Yellow with FEM® technology is delivering fast, effective and immediate results on vascular lesions, bloodless removal of bulky lesions, and stimulation collagen for rejuvenation and is now setting a gold standard for Melasma treatment. It is the combination of the perfect wavelength, the perfect penetration depth and the perfect power density that makes the Dual Yellow laser with FEM® technology unique in the world.
