公司简介

Visionflex 是一家位于悉尼的澳大利亚公司, 专营应用于医疗和远程保健领域的尖端技术。

Visionflex 通过经销商网络为世界上多个大型公共和私人医院提供摄像产品, 并参与了许多国内和国际上的科研和健康护理项目。Visionflex 通过结构化的服务协议、个性化的客户关系, 提供高水平的培训和服务, 对此我们引以为豪。

Visionflex 的产品可以整合到柜厨或定制的移动系统中, 以满足不同的客户需求, 并且 Visionflex 的产品经过强化, 适用于乡间和偏远地区。Visionflex 多功能的标配设备具有多种特殊功能, 确保客户以最高效率达成任务。

关键技术或领先技术

Flexicam 医疗摄像方案——为乡间和偏远地区的患者传递高品质光学诊断影像给专科医生。

世界上最模块化和独特的医学摄像系统。该 Flexicam 医学成像系列将最新的微电子技术、优质光学配件、高分辨率液晶平板、独特的人体工学设计整合成一个便携的小包, 令客户工作更轻松。无论是在偏僻地区, 或是难以获得专科医生服务的环境中访视病患, Flexicam 系列摄像机将使您可以快速简单地在单次访视中完成所有所需的检查。

该 Flexicam 医疗摄像方案旨在通过实时视频会谈使患者得以与专科医生面谈, 或是经由互联网储存、转发图像给专家审阅。患者可以在当地社区进行检查和拍摄, 使专科医生可在安排出诊前线对患者进行检查和诊断。此方案不但造福患者, 且同时为医疗系统避免了不必要的差旅开支和出诊, 从而节约相当大的开支。

该 Flexicam 摄像可被用于视频耳镜检查、口腔内外的牙科影像、皮肤科、窦性疾病检查、启用视频插入导管、内窥镜手术、常规医疗成像等。

类别

设备类：医疗设备和医院用品

以下哪项最能描述贵公司关键技术或领先技术的发展阶段？

产品已经上市

合作机会

医疗器械销售伙伴、国际医疗器械分销商。

以下领域内的新客户：医学影像、医疗评估中心、全科门诊、偏远地区医疗工作者、护理院、采矿业 / 勘探气 / 勘探油人员健康护理、牙科门诊、健康和安全人员、健康矫正护理、临时或机动的医疗团队。

ABOUT THE COMPANY

Visionflex is an Australian owned company located in Sydney, Australia and specialising in cutting edge technology for the medical and telehealth sectors.

Through our dealer network, Visionflex has provided imaging solutions worldwide for a number of large public and private hospitals and are also involved with many research and healthcare programs

nationally and overseas. We pride ourselves on the level of training and ongoing service we provide through structured support agreements and personal customer relationships.

Our products can be integrated into cabinets or customised mobile systems to suit your individual requirements and are ruggedized for remote and rural applications. Our versatile devices come standard with a variety of special features that will ensure your tasks are performed with optimal efficiency.

KEY OR LEAD TECHNOLOGY

Flexicam Medical Camera Solutions – High quality optical diagnostic images to the specialist for remote and rural patients.

The world's most modular and unique medical camera system. The Flexicam range of medical cameras brings state-of-the-art microelectronics, superior optics, high resolution LCD flat panel and a unique ergonomic design into one compact package to make your job easier. Whether you are travelling into remote locations or visiting patients in areas where specialist services are not easily accessed, the Flexicam range of cameras will allow you to perform all the required examinations in one quick and easy visit.

The Flexicam camera solutions are designed to bring the specialist to the patient via a live video conferencing link or via storing and forwarding images through the internet for review. Patients can be screened and imaged in their local communities allowing specialist review and diagnosis before any travel arrangements are made. This is beneficial for the patient while also saving considerable costs for the health system by eliminating unnecessary travel expenses and face to face patient visits.

The Flexicam cameras can be used for video otoscopy, intra & extra-oral dental imaging, dermatology, sinus examinations, video enabled catheter insertions, endoscopic procedures and general medical imaging.
